wirl@goeg.at

ICT for Health and Environment

Austrian Public Health Institute GÖG/ÖBIG

established in 1973; about 100 employees

Working fields

- Health Care Planning
- Health Reporting
- Health Economics
- Health Promotion & Prevention
- Long Term Care
- Health profession
- Transfusion & Transplantation

Experience

- Periodic Public Health Reports including environmental data
- International cooperation:
Environmental Health Information System (ENHIS, ENHIS2); EUPHIX

ICT for Health and Environment

Austrian Health Information System (ÖGIS)

- Integration of data sources in **one analysis tool** (based on GIS technology)

<i>Health Data</i>	Source	Fee	Timeliness	Reliability	Completeness
Mortality Statistics & Life Expectancy	ST.AT	Yes	✓	✓	✓
Cancer Registry	ST.AT	Yes	-	≈	≈
Hospital Admissions	MoH	No	✓	≈	✓
Military Check-up Data	MoD	No	≈	✓	✓
Traffic Accidents	KfV	Yes	✓	✓	✓
Health Interview Surveys & health behaviour	ST.AT	Yes	≈	✓	✓
Population Census & socio-economic /housing	ST.AT	Yes	≈	✓	✓

ICT for Health and Environment

<i>Exposure Data</i>	Source	Fee	Timeliness	Reliability	Complete-ess
Air Pollution	MoE	No	✓	✓	≈
Drinking water Pollution	priv	Yes	≈	≈	-
Radon Potential	MoH	No	-	✓	✓
Radioactivity	MoH / MoE	No	✓	✓	✓
Noise	no systematically collected data available				

- Personal ID: Partially single-person-datasets (anonymous)
- High spatial resolution for almost all data sources (2.300 municipalities / communities)
- Periodical updates
- Linkage of Environment and Health data

- Demographie
- Sozioökonomie
- Lebenserwartung
- Todesursachenstatistik
- Krebsstatistik
- Diagnosen-/Leistungsdokumentation
- Stellungsuntersuchungen
- Arbeitsunfälle/Berufskrankheiten
- Straßenverkehrsunfälle
- Mikrozensus
- Heilmittelverbrauch
- Regressionsanalyse
- DLD-Analyse
- DLD-Regionalanalyse
- Betteninanspruchnahme
- KA-Statistik/Kostenrechnung
- Krankenanstalt Benchmarking
- Ärztstatistik
- Nichtärztliche Gesundheitsberufe
- Natürliche Einzugsbereiche
- Versorgungspotentiale
- GUM - Grand Unified Model

Data from Various Sources

Recommendations, Policy Decisions

ICT for Health and Environment

Advantage

- **Easy to use tool:** Tables, maps, graphs, trends, regression
- Comparability and stability
- High user rate within GÖG/ÖBIG
- Standard populations (Austria, Europe, WHO)
- Statistical analyses resolving time and space at maximum level of resolution → “monitoring”
- Usefulness of **data linkage** for public health policy and practice: Identifying “PH priority regions” and “hot spots”, “health goals”
- Providing information for policy development, for monitoring and evaluating policy effectiveness (“Public Health action cycle”)

ÖGIS data used for

- **Health reporting** (Monitoring)
- Health care planning
- Benchmarking
- Data analysis on demand (fee)
- **Interface for free data:**
<http://regis.oebig.at>

ICT Environmental Sustainability Research

www.ict-ensure.eu

- Potential of implementing ICT driven systems
- Promote linkage of health and environment
- Results and experience from conducted projects/studies Sustainability Research

Main objectives:

- Overview over existing expertise
- Survey report on projects dealing with „Health & Environment“ using ICT
- Present research programs in a comparable and concise format (template): to share knowledge
- Create a network of leading experts in the field of Environment and Health
